

The I-SERIES, by Harrison is a line of Integrated Hydraulic Technology systems, or IHT, that gives you the option to operate your Hydraulic Rescue Tool pumps using hydraulic motors, instead of gas or diesel engines, or electric motors. **IHT-HQ PROVIDES FLEXIBILITY** for your Hydraulic Rescue Tool system.

IHT-HQ can be installed on new apparatus *as well as existing apparatus*, with or without a Harrison Generator, to power up any of the Holmatro "SR-Series" rescue tool pumps. IHT-HQ's compact size provides enhanced performance, operation, and better packaging, **PLUS THE ABILITY TO DRIVE 4-TOOL SYSTEMS.**

- **IHT-HQ** Allows you to decrease your wheelbase & increases maneuverability of your Apparatus.
- **IHT-HQ** Eliminates small engine maintenance issues; Rescue Tool systems will start EVERY time.
- **IHT-HQ** Simplifies the operation of your Hydraulic Rescue Tool system; flip the switch.
- **IHT-HQ** Can be installed on new apparatus *as well as existing apparatus*.

IHT-HQ gives you the most flexible product configurations available.
